JESSIE Y. DOMINGO

SENIOR SOFTWARE ENGINEER | ENTERPRISE MODERNIZATION | APPLIED AI

Tarlac City, Philippines • jydomingo@gmail.com • +63 970 239 2895 • jessie-portfolio.jydomingo.workers.dev

PROFESSIONAL SUMMARY

Senior software engineer with 24+ years building and modernizing business-critical applications. Combines 20+ years of PowerBuilder and SQL experience with hands-on C#/.NET, ASP.NET Core, REST APIs, React, TypeScript, and PostgreSQL delivery. Supported nationwide government systems processing 15M+ annual transactions, with approximately 99.9% availability. Recent work includes measurable performance and incident reduction, legacy integration, OCR automation, and governed AI-agent engineering.

CAREER HIGHLIGHTS

- Improved enterprise application performance by ~30% and reduced production incidents by ~45% through SQL optimization, refactoring, and root-cause fixes.
- Supported nationwide LTO systems processing 15M+ transactions annually across 200+ offices, maintaining approximately 99.9% service availability.
- Modernized legacy applications with ASP.NET Core REST APIs and built practical automation using Python/Tesseract OCR, Zapier, and Make.com.

TECHNICAL EXPERTISE

Languages & platforms: PowerBuilder 7–2022, C#, .NET, ASP.NET Core, JavaScript, TypeScript, React, Python

Data & integration: SQL Server, Sybase ASE, Oracle, PostgreSQL, REST APIs, EF Core, Dapper, OpenAPI

Architecture & delivery: Clean Architecture, DDD, CQRS, modular systems, OIDC/JWT (Keycloak), YARP, Docker, Git, Azure DevOps, Agile/Scrum

Applied AI & automation: Agent versioning, model gateway/provider routing, pre-call budget controls, approval workflows, tool-execution controls, OCR and workflow automation

PROFESSIONAL EXPERIENCE

Founder & Solution Architect | Nodeya Products | 2026–Present

- Lead architecture and hands-on engineering across an independent product portfolio spanning ERP, AI-agent orchestration, commerce, and workforce systems; keep product identity, data ownership, and integration boundaries explicit.
- Implemented NexAgent slices for immutable, content-addressed agent versions, provider routing, pre-call budget hard stops, an idempotent tool registry, digest-bound approvals, and durable workflows.
- Early model/provider-routing and tool-registry slices were live-verified on a temporary local stack with a mock provider; later approval/workflow/handoff slices are test-backed, not live-verified or production-deployed. Tool execution remains simulated; no production sandbox is claimed.
- Designed shared platform contracts and scoped integration patterns using C#/.NET, ASP.NET Core, React, TypeScript, PostgreSQL, Keycloak, YARP, and Docker; applied outbox delivery and idempotency where approved.

Independent Software Consultant | Singapore Client (Remote) | Feb 2026–Mar 2026

- Delivered a PowerBuilder/C# quotation management MVP, Python/Tesseract OCR pipeline, workflow automation, and prototype REST integration for legacy systems.

Senior PowerBuilder Developer | Intogreat Solutions | Feb 2025–Jan 2026

- Maintained Australian insurance underwriting applications; improved performance ~30% and reduced production incidents ~45% with SQL optimization, refactoring, and lasting corrective fixes.

Application Development Analyst | Stradcom Corporation | Sep 2008–Feb 2025

- Developed and supported nationwide LTO enterprise systems processing 15M+ annual transactions across 200+ offices; helped sustain approximately 99.9% availability.

- Extended PowerBuilder applications with ASP.NET Core REST APIs; optimized SQL Server queries, procedures, indexes, and database operations.
- Delivered requirements analysis, design, coding, testing, deployment, incident response, and production support with cross-functional Agile teams.

Earlier Experience | SMCT Realty & Holdings (2006–2007); Tarlac Mac Enterprises (2002–2006)

- Built accounting, inventory, POS, reporting, and operational systems with PowerBuilder, VB.NET, and SQL Server; automated reporting and maintained reliable business operations.

SELECTED PRODUCT WORK

Nodeya main products: NexOne (standalone 33-module ERP), NexAds (AI marketing product; frontend and provider-sync work remain), and NexSuite (Nexora, NexTalent, NexTrade, NexDesk, NexSpace, NexCRM, and NexAgent). **NexAgent:** Governed agent lifecycle, provider gateway, budget controls, approval-bound tool actions, and durable workflow slices. **NexTrade:** Commerce, POS, inventory, and accounting workflows with release gates still open. **Nodeya Platform:** Modular target for approved shared capabilities; product migration and runtime verification vary.

EDUCATION & PROFESSIONAL DEVELOPMENT

Certificate in Computer Programming, STI Tarlac City (1998–2000). Civil Engineering studies, Tarlac State University (1996–1998; undergraduate). Training: Java NC III (2026); React/Next.js (2024); JavaScript (2023); Agile Project Management (2023); ASP.NET Core MVC & Azure (2022); C#/.NET (2021); PowerBuilder & SQL (2003–2004).
